📍 Las Palmas de Gran Canaria

SUMMARY

I am a recently graduated as a full stack developer, motivated to learn and improve my knowledge. I am looking for innovative and interesting projects, and I would be interested in working with technologies such as React, Angular and NodeJS, I am willing to learn new languages and technologies, which I would be very excited about.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Instituto Tecnológico de Canarias - 03/2024 - 06/2024

Development of an online store with an augmented reality glasses viewer, where users could try on the glasses before buying them.

- Project where I worked creating the API and database logic from scratch, where I improved my knowledge in implementing 3D elements in a web application using three.js as a tool.
- I used technologies like React with Tailwind CSS for the frontend, NodeJS with Express and Sequelize for the backend, and MySQL as the database.

Full Stack Developer

IES El Rincón - Erasmus project - 02/2024 - 03/2024

Development of an application to organize and manage beach cleaning events.
This project allowed me to meet people of different nationalities and their work methodologies, practice my English skills with full communication in English, and improve my teamwork experience.

3D Object Modeler

IIS Tecnico-Professionale - 04/2022 - 06/2022

Erasmus internship in Spoleto, Italy, creating 3D models for a local truck trailer company.

SKILLS

- Experience in teamwork in both English and Spanish.
- Positive and organized attitude.
- Confidence in myself.
